NOTES:
1. Phosphorus Recovery building walls to be double canted steel frame clad in profiled metal panels.
2. Lower and upper sections separated by horizontal "shadow" band to decrease apparent mass.
3. Flat roof to be at similar height to the adjacent SBR units & be clad in same darker coloured cladding as "band".
4. Siding profile to complement the adjoining WTE building.
5. Floor slab and foundations to Engineer's design and specification.
