The scope involves required upgrades to the current wastewater pumping station including removal of paladin fencing and control kiosk, construction of concrete plinth, installation of new concrete wet well, control kiosk, valve chamber, storm screen isolation valve chamber. Finally, the site will have a new fence installed. The site lies northwest of Ballinamore, Co. Leitrim and is located beside the local GAA pitches and recycling centre. In accordance with Regulation 42(7) of the European Communities (Birds and Natural Habitats) Regulations 2011 as amended, **Uisce Éireann has made a determination following screening that an Appropriate Assessment is not required** as the project is not directly connected with or necessary to the management of the sites as European site(s) and **as it can be excluded**, on the basis of objective information and in light of the conservation objectives of the relevant European Site(s), **that the project, individually or in combination with other plans and projects, would have a significant effect on a European Site.**

This determination is based on the nature, location, scale and duration of the proposed works, including any temporary works and excludes any consideration of mitigation measures.
